

Dear Sirs,

We would like to inform you about our portfolio in Oil products.

We entered the oil market as well as other products from Russia and nearby countries, where, due to the war there has been market disruption and some good opportunities have arisen.

We have available from our partners a series of important products related to Oil, Urea & Fertilizers, animal feed, foodstuffs, Coal, e.t.c., for which the war in Ukraine has caused a great shortage and consequently a great demand.

The Petroleum products we provide:

- Diesel GAS D2 OIL GOST 305-8250
- Aviation Kerosene Colonial GRADE 54
- JET A-1
- Mazut M100 10585-75/99
- Virgin Fuel D6
- Liquefied Petroleum Gas [LPG] GOST: 20448 90
- Bitumen Grade 60/70 AND 80/100
- LPG (Liquefied Petroleum Gas) GOST 20448-90
- GAS OIL EN 590 10 PPM
- LNG (Liquefied Natural Gas) GOST 5542-87
- Export Blend CRUDE GOST: 51858-2002
- Diesel ULTRA-LOW SULPHUR (ULSD 500 PPM)

For all those products, we have an agreement with the Suppliers to have lower prices and better priority in delivery.

But there are some specific rules and procedures we must be following to have these important benefits. And also some minimum level of orders.

It is mandatory for our Supplier to know the end buyer. The Supplier requires to get first a Letter of Intent (LoI) with the end buyer's company information with all details and its bank reference.

The Supplier will check the buyer's credibility and their financial capacity with their bank and if everything is O.K., then they will issue an official offer.

The commission to liaison companies or brokers is paid fully by the buyers at the same time as paying the goods.

So, we can offer the end buyers lower prices and they pay us our commission. And the final cost they pay will be lower.
